

TIPS TO KEEP PERSONAL DATA SAFE

SET COMPLEX PASSWORDS

The first line of security for your sensitive information is your password. Ensure your passwords are lengthy, challenging, and specific to you.

DON'T SHARE YOUR PASSWORDS

Don't share your passwords or write them down. Re-using passwords increasing your risk of being hacked. Always ensure your email password is a different password and complex. Once your email is hacked, you other accounts are at an increased risk of being hacked.

KEEP YOUR COMPUTER UP TO DATE

Keeping your computer software up to date is one of the best ways to prevent a cyber attack as it includes the latest security patches that hackers know about

MAKE A DATA BACKUP

Back up your data, to the cloud if possible. Don't always assume that your organisation is doing this for you.
